```python
## example
def dvs():
  print("Hello from dvs")
dvs()
```

```
      Hello from dvs
```

```python
def dvs(dvsss):
  print(dvsss+" dvs ")
dvs("good")
dvs("fine")
dvs("great")
```

```
      good dvs
      fine dvs
      great dvs
```

```python
## This gives 2 arguments and gets 2 arguments
def dvs(dvss, dvsss):
  print(dvss + " " + dvsss)

dvs("good", "cool")
```

    good cool

```python
def voting(g,n,a):
 print(g +"male")
 print(n +"dvs")
 print(a +"18")

voting(' gender ',' name ',' age ')
```

```
      gender male
      name dvs
```
